Background and Mission

The Stewardship Council was formed as the result of a PG&E Settlement Agreement (D.03-12-035) with the California Public Utilities Commission (“CPUC”) in 2003 and the Stipulation Resolving Issues Regarding the Land Conservation Commitment (“Stipulation”). As part of the 2003 PG&E Settlement Agreement and Stipulation, a Land Conservation Commitment was established to permanently protect PG&E Watershed Lands and uses and invest in efforts to improve the lives of young Californians through connections with the outdoors.

The Settlement Agreement required PG&E to establish the Stewardship Council and provide \$100 million toward land conservation and youth engagement; \$70 million for the land conservation program and \$30 million for a program to connect underserved youth to the outdoors. PG&E was authorized to recover these costs through retail rates. As of December 31, 2021, the Stewardship Council had approximately \$18 million in remaining assets, which are invested in conservative financial instruments and almost entirely allocated or restricted for specific purposes to implement our work.

Incredible winter vistas at Sky Mountain Camp, by SJCOE, 2018

The Settlement Agreement establishes that 140,000 acres of PG&E’s Watershed Lands will be conserved in perpetuity for outdoor recreation, sustainable forestry, agriculture, natural resource protection, open space preservation, and protection of historic and cultural resources. The permanent protection, preservation, and enhancement of these Beneficial Public Values (“BPVs”) is achieved through the donation of a portion of the Watershed Lands to qualified entities, establishment and funding of conservation easements on the Watershed Lands, promotion of new collaborative partnerships, and grant funding of a variety of enhancement projects.

Located across more than 20 counties, the Watershed Lands encompasses some of California’s most beautiful landscapes. There are almost 1,000 parcels that PG&E has identified for their management purposes, not to be confused with subdivision parcels used by the County Assessor’s offices, that stretch from Shasta County in far northern California to Kern County in the south, and cover both the Sierra Nevada and Cascade ranges to the east, to the Coastal Mountain Range in both Mendocino and Lake Counties, within the Eel River watershed. For

purposes of implementing the Land Conservation Commitment, the Stewardship Council grouped the parcels into 47 planning units.

Update on Implementation of PG&E's Land Conservation Commitment

With Stewardship Council Board approval completed in 2020 for all Land Conservation and Conveyance Plans ("LCCPs") the Stewardship Council has focused efforts on completing transaction documents, supporting the regulatory approval process, closing escrow and efforts to dissolve our organization and set up contracts for support services. Between mid August 2021 and January 31, 2022, six transaction agreements have been signed, seven advice letters were submitted to the CPUC for approval, four projects have been submitted to the Federal Energy Regulatory Commission (FERC) for approval, and six transactions have closed escrow.

As of February 1, 2022, 27 transactions remain to close escrow and of these, 18 transactions still require Transaction Agreements or Purchase and Acquisition Agreements before advice letters can be prepared for regulatory submittal. The Stewardship Council Board took an action requiring all, "Transaction Agreements (TA) or Purchase and Acquisition Agreements (PAA) for donated transactions must be signed by each party by December 31, 2021," (Stewardship Council Board Action September 2021). That date recently passed, and agreements with the University of California for the Pit River property (expected early February), and with CalFire for four properties – Lake Spaulding, Battle Creek, Bear River (PLT) and Pit/Tunnel – are still pending. If these agreements have not been signed by the time our Board meets next on April 6, the Board may consider an action to rescind the fee title donation recommendations.

The Board routinely reviews the timeline of estimated target dates for the completion of all land donation and conservation easement transactions as well as forecasted expenditures of our remaining funds. The timeline includes dates for completion of major deliverable milestones, such as anticipated regulatory approvals and dates of anticipated escrow closings for the 27 remaining land transactions. For both the transaction schedule and our dissolution planning efforts, close of escrow and completion of Stewardship Council's responsibilities are anticipated by the end of 2023. The transaction schedule influences enhancement project funding projections, grant funding release dates and totals, and budget projections through sunset of the Stewardship Council.

The Stewardship Council's Biannual Reports to the CPUC provide background information and detail about our work, focusing on updates since our last report. This February 2022 report provides an update between mid-August 2021 and January 31, 2022, reporting on current progress to oversee and implement the Land Conservation Commitment. At the end of this report are seven exhibits that provide additional detail about the topics addressed herein.

Land Conservation and Conveyance Plans Adopted by the Stewardship Council

As of December 2020, the Board approved all 96 LCCPs for conservation easement or conservation covenant transactions, including 40 proposed land donations and 56 properties retained by PG&E. The LCCPs describe how the proposed transactions satisfy the requirements of the Settlement Agreement and Stipulation. After the Board approves a LCCP, PG&E prepares formal documents to submit for regulatory approval from the CPUC for all transactions, and from FERC generally only for PG&E retained properties.

The 40 donated properties total approximately 38,659 acres and the 56 properties retained by PG&E total approximately 102,114 acres. For additional information see *Exhibit 1 Transaction Status and Acreages*.

PG&E's Regulatory Filings

The CPUC has oversight over the Land Conservation Commitment, and approval authority of the advice letters for each of the land transactions. PG&E has filed 78 advice letters with the CPUC for approval of conservation easements, conservation covenants, and fee donation transactions. 18 more filings are anticipated. Since the August 2021 Biannual Report, seven advice letters were filed with the CPUC – Lake Britton donation to California State Parks, Bass Lake PG&E retained, Lake Britton/Hat Creek #2 as well as New Fall River Mills donations to Pit River Tribe, North Fork Mokelumne River PG&E retained, and Cow Creek and Bear River donations to CalFire. The CPUC has approved four transactions since our last report – Lake Britton donation to California State Parks, Bass Lake PG&E retained, New Fall River Mills donation to Pit River Tribe, and North Fork Mokelumne River PG&E retained. There are currently three applications filed and under review by the CPUC, including Cow Creek donation to CAL FIRE, submitted by PG&E to the CPUC January 11, 2022, and Lake Britton/Hat Creek #2 donation to Pit River Tribe, submitted by PG&E to the CPUC January 27, 2022. Both conservation easements will be held by Shasta Land Trust. PG&E submitted the advice letter to the CPUC for the Bear River donation to CAL FIRE, with Bear Yuba Land Trust as the conservation easement holder, on January 28, 2022.

The next advice letters anticipated to be submitted to the CPUC by PG&E over the next six months in anticipated chronological order, include:

- Pit River donation to University of California, conservation easement held by Shasta Land Trust
- Lake Spaulding donation to CAL FIRE, conservation easement held by Placer Land Trust
- Lake Spaulding-Rucker PG&E retained, conservation easement held by Bear Yuba Land Trust
- Battle Creek donation to CAL FIRE, conservation easement held by Western Shasta Resource Conservation District
- Bear River donation to CAL FIRE, conservation easement held by Placer Land Trust

- Pit/Tunnel Reservoir donation to CAL FIRE, conservation easement held by Shasta Land Trust
- Lake Spaulding-Lake Valley Preserve, conservation easement held by Placer Land Trust
- Fall River Mills PG&E retained, conservation easement held by Shasta Land Trust
- Oroville PG&E retained, conservation easement held by Northern California Regional Land Trust
- Hat Creek PG&E retained, conservation easement held by Shasta Land Trust
- Lake Britton PG&E retained, conservation easement held by Shasta Land Trust
- Battle Creek PG&E retained, conservation easement held by Shasta Land Trust

FERC approval is generally only required for PG&E **retained** property transactions. Since mid-August 2021, PG&E has filed four more applications to FERC – Lower Drum Folsom, Eel River, Bass Lake, and North Fork Mokelumne River – for a total of 40 applications to FERC for approval of conservation easements. FERC has approved three – Bass Lake, Lower Drum Folsom and Deer Creek NID – since mid-August 2021 for a total of 38. PG&E has 12 more project transactions to submit to FERC for approval, with the next submittals expected to be Lake Spaulding-Rucker, Lake Britton, Fall River Mills, and Hat Creek.

Completed Land Transactions

Since mid-August 2021, six transactions have closed escrow:

- Fall River Valley PG&E retained, conservation easement held by Ducks Unlimited
- Eel River donation to USFS, conservation covenant held by Sierra Nevada Conservancy
- Hat Creek #1 donation to Pit River Tribe, conservation easement held by Shasta Land Trust; A ribbon cutting celebration was held in November 2021 by the Pit River Tribe
- Lower Drum-Folsom PG&E retained, conservation easement held by Wildlife Heritage Foundation
- Bucks Lake PG&E retained, conservation easement held by Feather River Land Trust
- Lake Britton donation to California State Parks, conservation easement held by Shasta Land Trust

As of January 31, 2021, a total of 69 out of the 96 transactions have closed escrow, totaling 55,178 acres. *Exhibit 1 Transaction Status and Acreages* details each transaction that has closed, as well as those transactions that have been approved by the Board and are still in process toward finalization.

Completed PG&E Retained Lands. When escrow closes, the conservation easements are recorded. So far on PG&E retained properties, conservation easements have been recorded for 39 properties totaling approximately 37,604 acres at the following planning units: Doyle Springs, Kern River, Narrows, Middle Fork Stanislaus, Lower Bear, Iron Canyon Reservoir, Fordyce, Merced River, Lower Drum, Kilarc, Wishon Reservoir, Lake Spaulding, Blue Lakes, McArthur Swamp, Chili Bar, Mountain Meadows, Lake McCloud, Willow Creek, Kerckhoff Lake,

Lyons Reservoir, Cow Creek, Battle Creek, Kings River, Manzanita Lake, Butte Creek, Philbrook Reservoir, Auberry, Butt Valley Reservoir, Fall River Valley, North Fork Feather River and Bucks Lake.

Completed Donated Lands. Fee title has been conveyed for 30 land donations encompassing approximately 17,574 acres, with conveyed conservation easements or conservation covenants. PG&E has transferred fee title of lands to the following organizations: University of California, Tuolumne County, Placer County, the Auburn Area Recreation and Park District, the Fall River Valley Community Services District, the Potter Valley Tribe, Maidu Summit Consortium, CAL FIRE, Madera County, San Joaquin County Office of Education, the Fall River Resource Conservation District (RCD), California State Parks, Pit River Tribe, and the USFS.

*Photo: Bucks Lake, Plumas County,
by Feather River Land Trust, 2021*

For lands conveyed to the USFS with concurrent recordation of conservation covenants held by Sierra Nevada Conservancy, planning units include Lake Britton, Battle Creek, Deer Creek, Wishon Reservoir, North Fork Mokelumne River, Lower Bear Area, Blue Lakes, Fordyce (White Rock) Lake, Lyons Reservoir, and Eel River.

Conservation Easements and Conservation Covenants

The BPVs associated with PG&E's Watershed Lands will be protected in perpetuity by conservation easements, or in the case of lands donated to the USFS, by conservation covenants held by Sierra Nevada Conservancy. The conservation easement and conservation covenant holders will monitor ongoing uses of the lands on a regular basis to ensure compliance with the conservation easement or covenant terms and can take enforcement action if appropriate. See *Exhibit 2* for a map of conservation easement and covenant holders. The Stewardship Council is providing funding through an endowment agreement to the conservation easement and conservation covenant holders to fund the long-term cost of monitoring, administration, and legal defense and enforcement of the conservation easements.

The conservation easements are held by non-profit organizations (primarily local land trusts) and public agencies with expertise and experience holding conservation easements. These organizations typically hold accreditation by the national Land Trust Alliance. The Board has achieved consensus on approval of the LCCP, which includes the conservation easement or conservation covenant (for USFS and Sierra Nevada Conservancy), for all 96 Watershed Lands.

The Sierra Nevada Conservancy holds the conservation covenants over approximately 4,529 acres donated to the USFS. Fee title to all ten of the properties donated to the USFS have closed escrow, along with the conveyance of the ten conservation covenants. Timeline and other information regarding each project transaction is provided in *Exhibit 1*.

Parcels Not Being Encumbered by a Conservation Easement

The PG&E Settlement Agreement and Stipulation contemplated the possibility that some parcels of Watershed Lands would not have a significant public interest value and not need to be protected by a conservation easement.¹ The Stewardship Council developed a robust process for evaluating the public interest value of each of the candidate parcels. The process consists of: (1) the establishment and application of a set of considerations for evaluating the public interest value of each parcel, focusing on the BPVs associated with the parcels; (2) the assessment of the physical condition of each parcel through review of existing information, satellite imagery, and site visits; (3) consultation with the entity that would hold any conservation easement established on the subject parcel; and (4) the review of applicable databases with historical information pertaining to biological and cultural resources that may be present on or in the immediate vicinity of each parcel.

As previously reported the Board made findings that approximately 115 acres in 35 separate parcels (detailed in *Exhibit 4*) do not have significant public interest value (NSPIV) and therefore will not be protected by a conservation easement. For additional information, please see *Exhibit 3, No Significant Public Interest Value Findings*.

Stewardship Council Board Recommendations for Fee Title Donations

In June 2019, the Stewardship Council Board made its final recommendations for which entities would hold fee title and which land trusts would hold the conservation easements for each of the properties. Initially, the Board selected a diverse set of entities to receive fee title to approximately 47,000 acres of Watershed Lands. Due to a variety of reasons more fully detailed in prior Biannual Reports submitted to the CPUC, some fee title donees withdrew from recommended donations. The Stewardship Council anticipates that a total of 38,403 acres of Watershed Lands will be transferred in 40 separate transactions to public agencies, nonprofit organizations, and Native American entities as further shown in Exhibit 1.

Status of Fee Title Donations to State Agencies

The Stewardship Council has recommended 11 distinct fee title donations to CAL FIRE, California State Parks, and University of California, Berkeley Forests (UC).

CAL FIRE was selected to receive approximately 15,238 acres for the purpose of expanding the Demonstration State Forest system. The first donation to CAL FIRE – 1,052 acres at the North Fork Mokelumne River planning unit - closed escrow at the end of 2019. The remaining donations to CAL FIRE had significant issues that needed to be worked through that caused delays in signing transaction documents. These additional CAL FIRE transactions have begun to be submitted to the CPUC, starting with Cow Creek and Bear River (Bear Yuba Land Trust) in January, and then in the following order: Lake Spaulding, Battle Creek, Bear River (Placer Land

¹ I.02-04-026, Appendix E, at 38; Stipulation Resolving Issues Regarding the Land Conservation Commitment.

Pacific Forest and Watershed Lands Stewardship Council

Biannual Report to the CPUC

Trust), and finally Pit/Tunnel in the 2nd quarter of 2022. DGS, CAL FIRE, PG&E and the Stewardship Council have been working closely to work through the State's requirements.

The Lake Britton donation to California State Parks of 135 acres was approved by the CPUC in August, and closed escrow in December. The donation will add acreage to Burney Falls State Park, a major recreation area in the region with hiking, a general store, swimming, birdwatching, picnicking, and rustic cabins for rent. It is also a common point of interest and resupply spot for long-distance hikers on the congressionally established Pacific Crest Trail.

Donations to UC in the Narrows and Lake Spaulding planning units total approximately 1,500 acres and closed in 2015 and 2016 respectively. The remaining donation to UC of 3,203 acres in the Pit River planning unit should be submitted to the CPUC in the next few months.

Status of Fee Title Donations to Native American Entities

In many cases, the Watershed Lands hold significant historic and cultural value as ancestral homelands, while also having important wildlife habitat and recreational values. The Stewardship Council has facilitated collaboration and dialogue among stakeholders resulting in groundbreaking partnerships between nonprofit, public and tribal entities including the Pit River Tribe, Potter Valley Tribe, and Maidu Summit Consortium. There are ten LCCP's totaling almost 8,200 acres for donation to the three tribes, shown in *Exhibit 4*.

The first two of these historic land donations back to a tribal entity closed escrow in 2019 with 879 acres of land in the Eel River planning unit for both the Upper and Lower Trout properties returned to the Potter Valley Tribe. Mendocino Land Trust holds the conservation easements for the Potter Valley Tribe donated properties.

Since our August 2021 report, the Pit River Tribe received fee title ownership of the Hat Creek property on October 15th. Hat Creek is the first of three land donations to the Pit River Tribe for a total of approximately 4,343 acres of Shasta County ancestral territories. A ribbon cutting celebration was held in November by the Pit River Tribe with support from the Stewardship Council. State representatives participated at the outdoor event, including Stewardship Council Board Representative Allison Brown, plus three others including CPUC Commissioner Martha Guzman Aceves. The Stewardship Council was represented by three staff members, and PG&E, Shasta Land Trust staff and board members and CalTrout had representatives there as well. [Link here](#) for a KRCR news report with a video link showing ceremonial singing.

Planning Unit, by
Megan Tolbert,
Stewardship
Council, November
2021*

The other two land donations to the Pit River Tribe that have not yet closed escrow are New Fall River Mills which was approved by the CPUC November 25, 2021, and Lake Britton/Hat Creek #2 that was submitted to the CPUC on January 27, 2022. These two planning units comprise the remaining 3,554 acres that will go to the Pit River Tribe. Shasta Land Trust holds the conservation easements for the Pit River Tribe donated properties.

The Board also approved five LCCPs for fee donations to the Maidu Summit Consortium (MSC) at the Lake Almanor and Humbug Valley planning units, totaling 2,935 acres. The 2,325-acre property at Humbug Valley, locally known as Tàsmam Koyòm, closed escrow in September 2019. Three properties at the Lake Almanor planning unit, the 8-acre Maidu Trail, 296-acre Maidu Wetlands, and 164-acre Maidu Forest properties have closed escrow and transferred to MSC. The final donation of approximately 142 acres at the Maidu Cemetery at Lake Almanor was submitted to the CPUC for approval on August 6, 2021, and was swiftly approved a few weeks later by the CPUC on August 31st. There is a lot line adjustment being approved by Plumas County to correct the legal description of the properties before escrow can close for the land donation. Feather River Land Trust holds the conservation easements for the MSC donated properties.

Stewardship Council has actively connected with tribal entities across the Watershed Lands to facilitate introductions and relationships with recommended fee donees of other properties. Tribal entities and fee donees are developing conservation partnerships for the properties. For example, in the case of the donation of lands at Manzanita Lake to Madera County, the North Fork Rancheria of Mono Indians of California and the County have

developed a Memorandum of Understanding for the property and will jointly partner on future management of the BPVs. The Stewardship Council strongly encourages these types of conservation partnerships for transactions across the Watershed Lands. Please reference the summary of our efforts that support Native American interests on PG&E Watershed Lands, available under separate cover, and titled *Stewardship Council Native American Outreach and Engagement Efforts* (Stewardship Council, August 2019).

Property Tax Neutrality

The Settlement Agreement and Stipulation that established the Land Conservation Commitment require that the Land Conservation Plan being developed by the Stewardship Council provide property tax revenue so that the totality of dispositions in each affected county will be “tax neutral.” Since many of the potential fee donees expressed concern about their ability to make in lieu payments to counties for lost property taxes, the Stewardship Council agreed to use its funding to make in lieu property tax payments, and the CPUC provided approval of this approach. Counties were originally provided with the option of choosing a lump sum payment, an annual payment, or annual installment payments totaling the lump-sum amount for a maximum of five years. However, on November 15, 2017, the Board took an action to establish a lump-sum payment as the sole and standard payment process when lands are transferred to organizations that are exempt from paying property taxes. The revised methodology is included in *Exhibit 5*. In fulfillment of the Tax Neutrality obligation, a county will receive a one-time lump sum payment in satisfaction of property tax neutrality after close of escrow for each land transaction. The lump-sum payment is calculated using a discounted cash flow analysis for perpetual payment streams, otherwise known as a Capitalization Rate (“Cap Rate”) detailed in the Property Tax Neutrality Methodology (*Exhibit 5*).

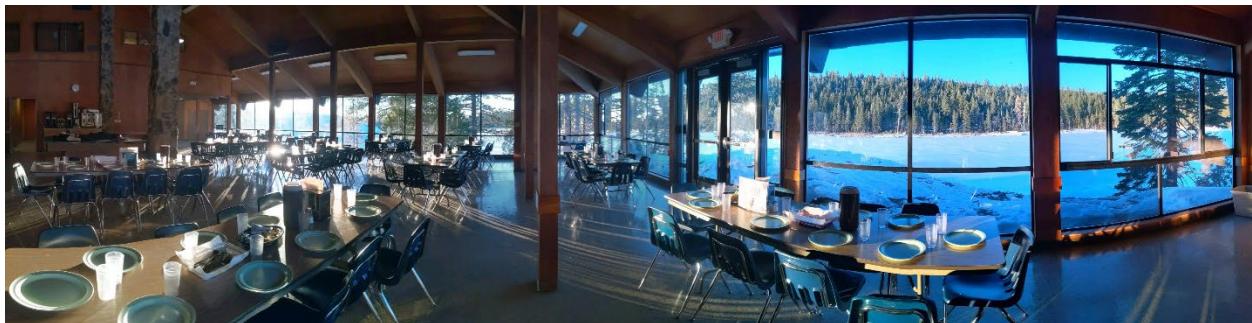

Photo above: The table is set and snow is outside, ready for welcoming students at Sky Mountain Camp! by SJCOE, 2022

Environmental Enhancement Program

Since launching the Enhancement Program in 2012, the Stewardship Council has awarded almost \$12.2 million, and paid over \$10.3 million in grants as shown in *Exhibit 6*. Overall, the Stewardship Council has budgeted approximately \$12.7 million for projects that enhance the BPVs of the Watershed Lands and promote productive partnerships involving landowners, conservation easement holders, local communities, youth, and other stakeholders. Examples of

enhancement projects include habitat restoration, recreational trails and facilities, cultural resource protection and interpretation, forest research, management plans, planning and feasibility studies, cultural surveys, and biological surveys.

At Sky Mountain Outdoor Education Center, San Joaquin County Office of Education (SJCOE) has completed necessary facility upgrades with the \$5 million provided by the Stewardship Council

to accommodate students, including safety and accessibility improvements. We are excited to report that the students will begin using the facility in February to learn about the forest and many of them will be seeing snow for the first time! SJCOE has hired staff including an onsite principal. We look forward to reporting more on their programming as they get up and running.

Photo left: The founding camper cohort at Sky Mountain Camp's freshly updated facilities, by SJCOE, 2022

Photo: Pit River Tribal Youth Crew cutting in the Fall River Lake Trail, by Pit River Tribe, 2021

Enhancement projects have been active in Shasta, Lassen, Madera, and Plumas counties at Fall River Lake, Indian Ole Dam at Mountain Meadows Reservoir, Manzanita Lake, Bucks Lake, and Tàsmam Koyòm (Humbug Valley).

1. Construction is mostly complete on the Fall River Lake Trail project, which Fall River Valley Community Services District and Lomakatsi Restoration Project. There are some finishing touches and sign installation for the native plants along the trail that will be wrapped up in the next couple months.

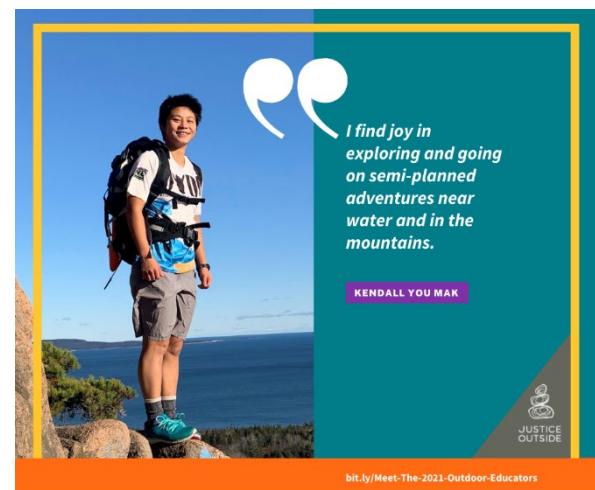

2. PG&E submitted an advice letter on 12/10/21 which was deftly approved on 1/9/22 by CPUC for the Mountain Meadows Conservancy project to install day use facilities and a trail at Indian Ole Dam at Mountain Meadows Reservoir.
3. At the Manzanita Planning Unit, Madera County has completed fuel reduction work and is designing and constructing trail and campground amenities for the Bass Lake North Fork Regional Trail.
4. Sierra Buttes Trail Stewardship is working with PG&E at Bucks Lake Planning Unit to prepare project proposal documents for adding several miles of trail.
5. At McArthur Swamp, the Fall River RCD is making progress on the water delivery system to support grazing and wildlife uses while also treating noxious weeds and implementing their management plan.
6. At Tàsmam Koyòm, MSC continues to plan campground improvements and visitor interpretation elements of the new Tribal Cultural Park, though recent damage from the Dixie Fire could affect their plans.

The Stewardship Council launched a competitive solicitation for Enhancement Grants in January 2020 with an estimate of up to an additional \$3 million in available funding. However, exact funding and the timing of availability is still unknown and depends on meeting key milestones including progress with the remaining transactions. After the concept proposal round with original requests totaling \$7 million, applicants were prioritized and the Stewardship Council eventually received eight full proposals which were again ranked based on the scoring criteria used by the Enhancement Review Committee and staff. Due to considerations regarding funding availability, project readiness, and priorities, the Board has not yet made a recommendation for funding any of the eight projects.

Youth Investment Program

The Settlement Agreement allocates \$30 million to establish a permanent program to connect underserved youth in the PG&E service area to the outdoors and the wonder of California's natural beauty.

In 2005, the Stewardship Council established a Youth Investment Program to support outdoor and environmental programming for youth, and in 2010 created the Foundation for Youth Investment ("FYI") intended to sustain this important work beyond the life of the Stewardship Council. In 2013, the Stewardship Council awarded a \$10.76 million grant ("Major Grant Agreement") to FYI later known as Youth Outside, to reflect the heart of their work. Staying nimble and relevant, in 2021, they renamed their organization Justice Outside, acknowledging their work is not only focused on solving the symptoms

of inequity, but rather, moving the needle to reverse historic systems of marginalization that have created those symptoms. Justice Outside envisions a “just world where Black, Indigenous, and Communities of Color experience safety, health, and abundant joy through meaningful relationships with one another and the outdoors.”

Since its creation, Oakland-based Justice Outside has been a recognized leader ensuring all youth have equitable access to meaningful outdoor experiences and the opportunity to be stewards of our natural resources long into the future. Justice Outside has utilized the Stewardship Council's youth funds and other funds they've raised to strengthen the engagement of underserved youth in outdoor activities and programs.

Fulfilling a great need in the outdoor program's community, in 2021 Justice Outside provided grants to 26 organizations (23 multi-year grants and 3 one-year grants) totaling \$855,000. A list of 2021 grantees can be accessed through this link: [2021 Grants JO.xlsx \(sharepoint.com\)](https://justiceoutside.org/grantmaking/grantees/2021-grantees/)

Justice Outside's historic grant program also funded the remaining year of a two-year grant program for 21 organizations, ranging in awards between \$15,000 and \$30,000 in 2020. For a list of grantees, go to this link: <https://justiceoutside.org/grantmaking/grantees/2020-grantees/>

The Stewardship Council has approximately \$10,466 of youth program funds remaining.

Financial Update

The Stewardship Council is funded through a \$100 million commitment (\$70 million dedicated to the Land Conservation Program and \$30 million dedicated to the Youth Investment Program), which was paid fully in ten \$10 million installments by PG&E from 2003 to 2013. As of December 31, 2021, the Stewardship Council had approximately \$18 million in remaining assets, invested in conservative financial instruments; most of which are allocated to program needs.

As part of its efforts to ensure sound stewardship of ratepayer funds, the Stewardship Council engages an independent accounting firm to perform an annual audit of its financial statements and uses an independent investment advisor. The Stewardship Council has received clean audit opinions for each of its years of operation, starting in 2004. Complete Financial Statements are available on the Stewardship Council's website.

Exhibit 7 includes a pie chart presenting Expenditures Through 2021, a table displaying 2021 Budget to Actual figures, and a table presenting figures providing 2022-24 Estimated Expenditures Through Dissolution. The Stewardship Council's 2021 Budget to Actual statement shows that actual expenditures totaled \$6.2 million versus a total budget of \$10.7 million. The 2022 through 2024 Estimated Expenditures Through Dissolution projects approximately \$15.5 million in spending. In 2022 we expect to expend approximately \$10 million, based upon transaction schedule projections. In 2022, we anticipate all land donations will close escrow, all

tax neutrality costs will be known and potentially paid, and enhancement projects will continue to make progress.

Total:	35	114.6	

Exhibit 3
NSPIV Findings

Planning Unit	Parcels	Acres	Date of Board Approval	Notes
Bear River	Port. 840	7.3	12.9.20	State Hwy 20 Caltrans right-of-way, 230' wide; designated scenic byway; no substantive public comments; no significant resources or BPV's
Auberry	Port. 1061	12.7	1.25.17 amended 9.20.17	Paved and encumbered by the Auberry service yard. Used as staging area for maintenance ops, work sheds, heliport, laydown area, storage for heavy machinery. -Fenced, no public access -Land surrounding service center protected by CE -no public comment
Bass Lake	1033	0.3	11.19.2015	Encumbered by back yard fence, shed, and landscaping. -Only accessible through private adjacent property, no public access - extremely small (.03 acres) - lot line adjustment planned for parcel to address encroachment
Bass Lake	1039	0.06	9.20.2017	Mostly paved parcel - extremely small (less than .06 acres) - encumbered by private driveway and landscaping from immediate landowner. - Though its on county road no public access, surrounded by private residences.
Bear River	867, 868	2	9.20.2017	Both parcels are Paved and encumbered by PG&E operations service yard and large office buildings - surrounded by private residences, and public road, but parcels are fenced and not accessible to the public.
Eel River	Port. 748	23.9	6.27.2016	This finding is based on a discrepancy concerning the ownership of the 23.9 acre area based on an incorrect property boundary survey that was conducted and recorded with Mendocino County in 1973. This discrepancy was discovered in 2015. As a result of this discrepancy, the 23.9 acre area cannot readily be encumbered with a conservation easement. Quitclaim completed.
Lower Drum	877, 878	2	5.3.2017	Parcels are located on a small strip of land between river and canal which are paved and are entirely encumbered by hydro facilities associated with Rollins Reservoir dam - safety concerns for outside easement holder to be monitoring these parcels which contain dam operations infrastructure and are in an inundation zone -no public access, not visible or accessible from public road.
Lower Drum	880	1	5.3.2017	Paved, narrow canal - isolated from rest of Bear River parcels -entirely encumbered by the canal - no public access, fenced for safety concern
Lower Drum	899-900	13	5.3.2017	Entirely Paved and encumbered by industrial PG&E service yard - includes operations buildings, trailers, storage facilities, parking lot and number of vehicles - both parcels are fenced and inaccessible to the public, surrounded by private residential and industrial properties
Lower Drum	905-906	2	5.3.2017	Small, narrow parcels, mostly paved - Encumbered by the Wise Canal and the Wise Penstock intake structures - fenced and inaccessible to the public, safety concerns with access
Lower Drum	908	2	5.3.2017	Paved - Encumbered by Wise power house and associated electrical facilities and a paved parking lot -Fenced and inaccessible to public - significant safety concerns with access.

Exhibit 3
NSPIV Findings

Lower Drum	912, 914, 915	3	5.3.2017	Paved, encumbered by a Newcastle Penstock, South Canal, and associated facilities, paved access road and parking area - fenced and inaccessible to public
North Fork Mokelumne River	991	1.4	5.2.2018	Mostly paved, located in Pine Acres subdivision, entirely encumbered by backyards of multiple landowners, fences, driveways, landscaping. Significant impacts from subdivision and no access. Not visible or accessible from public road.
Doyle Springs	1077	3	9.11.2013	Encumbered by transmission line corridor, steep topography, thin, isolated- visible but not accessible from road. Doyle springs transaction has closed.
Bear River	852	0.06	9.20.2017	Extremely small (.06 acres) and extremely isolated - encumbered by large communications microwave tower - consistently cleared to maintain tower - surrounded by private forest land inaccessible to the public - extremely difficult to physically access, requires hiking through private property
Fordyce (Kidd/Cascade) Lake	790	0.2	1.21.2016	Very small and isolated parcel, impacted by highway and adjacent industrial facilities. This transaction has closed.
Lower Drum	898	1	5.3.2017	Partially unpaved - contains about 1 acre of grassland the rest of the parcel is impacted by Wise Canal, adjacent facilities, fence and access road - ongoing problems with unauthorized camping and dumping of debris on parcel
Lower Drum	909	1	5.3.2017	Parcel is small and bisected by busy Wise Road. The section of the parcel south of Wise Road contains facilities associated with the Wise Powerhouse including a paved switchyard and parking area. Section of parcel to the north of road is open sloped grassland impacted by busy road, adjacent private driveway, and an underground gas line - while it is visible from the road it is not accessible from the road because of its steep incline - no public access or use opportunity
North Fork Feather River	667	1	1.24.2018	Partially encumbered by reflective microwave tower - surrounding vegetation consistently cleared to maintain communications tower - Remote and difficult to access, requires hiking uphill through private property - entirely surrounded by private forested land
Fall River Mills	133	2	1.24.2018	While it is located on the Fall River, it is a small inaccessible strip, surrounded by private residences and private agricultural land- parcel is legally described as 100 ft buffer between private land and the Fall River, meaning boundaries change with change in water line - A use agreement with the adjacent landowner exists for access through parcel to water livestock. Not visible or accessible from public road. -entirely surrounded by private land, no opportunity for public access or enhancement.
North Fork Feather River	668	2	1.24.2018	Small, isolated parcel -Partially paved, encumbered by a dirt access road, a helipad, and a microwave station that is served by a 12 kilovolt (kV) electric distribution line that ends on the parcel. -Surrounded by private property and is only accessible to authorized visitors on a private dirt road.
Lower Drum	913	3	5.3.2017	Inaccessible to the public, can only be accessed through parcels 914 and 915 - Primarily open grassland, though the eastern section contains encroachment by adjacent private homes, backyard fences, and mobile home - Large section of parcel falls within FERC boundary

Exhibit 3
NSPIV Findings

Lower Drum	910-911	4	5.3.2017	Parcels are immediately adjacent to and impacted by Wise Powerhouse - 910 contains some open grassland across the street from powerhouse, impacted by busy road and neighbor's paved driveway. 911 contains small portion of Auburn Ravine that is impacted by the powerhouse and associated improvements to the ravine, not visible from the road because of dense brush. Both parcels are inaccessible to the public because of steep topography and fences. Parcels lie within FERC boundary.
Willow Creek	1053, 1054	4.7	1.25.2017	Two parcels, dispersed by about 1 mile. 1053 not paved but encumbered by encroachment from adjacent autobody shop, multiple occurrences of trespassing, unauthorized building, and debris dumping . An unauthorized structure was built and partially torn-down on the north-eastern portion of the parcel. 1054 is partially paved, encumbered by canal hydro infrastructure. 1054 is not visible or accessible from public road.
Lower Drum	907	6	5.3.2017	Partially encumbered by Wise Penstock pipeline and dirt access road that runs through the parcel. -Contains sloped grassland and dense brush cover that is not accessible. -Impact from adjacent Mount Vernon Road and surrounding private residences. -Not accessible by the public- accessed regularly by PG&E for maintenance of the pipeline.
Oroville	679	6	1.24.2018	Extremely thin, inaccessible strip, dense shrub, impossible for a CE holder to monitor through dense brush, surrounded by over 20 land owners many of which have impacted or fenced off portions of the parcel . Not visible or accessible from public road. Too thin for significant development. No public access or visibility from public road- entirely surrounded by private property.
Hat Creek	193	9	1.24.2018	Transmission line corridor - cleared of trees for operation and maintenance of PG&E-owned 230 kV electric transmission lines -the power lines and required clearing area surrounding power lines encumber the entire parcel. Impact/enroachment by adjacent landowners on southern portion - no opportunity for public access or use - In FERC boundary

PROPERTY TAX NEUTRALITY METHODOLOGY

INTRODUCTION

The Settlement Agreement¹ and Stipulation² that established the Land Conservation Commitment require that the Land Conservation Plan being developed by the Stewardship Council provide property tax revenue, other equivalent revenue source, or a lump sum payment, so that the totality of dispositions in each affected county will be “tax neutral” for each county. Section 4.3 of Volume I of the Land Conservation Plan (LCP) adopted by the Stewardship Council in November 2007 described the Stewardship Council’s potential strategies and anticipated approach to achieving property tax neutrality at a programmatic level.

More recently, on September 17, 2009, the Stewardship Council adopted a funding policy. This policy further clarified the Stewardship Council’s approach to property tax neutrality and identified several potential vehicles to achieving this requirement. On March 30, 2011, the Stewardship Council adopted a set of guidelines which describe scenarios in which the Stewardship Council will make property tax payments to affected counties and further defined a set of overarching assumptions regarding property tax neutrality payments.

Table 1 in Appendix A lists the estimated acreage and estimated annual property taxes associated with PG&E watershed lands which have been recommended by the Stewardship Council Board of Directors for donation. The estimated total tax liability that would be subject to tax neutrality will depend upon the total acreage actually transferred, and the types of organizations receiving fee title to the lands. No PG&E watershed lands will be recommended for donation in counties that are not listed in Table 1.

PURPOSE OF PROPOSED METHODOLOGY

The purpose of this methodology is to establish a standard payment process when lands are transferred to organizations that are exempt from paying property taxes. The following methodology will be applied to all counties which experience a loss in property tax revenues due to a recommended donation of fee title as part of the Stewardship Council’s Land Conservation Commitment.

DETERMINING TAX NEUTRALITY PAYMENT AMOUNT

Following the Stewardship Council approval of a fee-title donation, the Stewardship Council will work with the affected county to calculate the payment amount for inclusion in the Stewardship Council’s Land Conservation and Conveyance Plan (LCCP).

1. Using the legal description and/or survey of lands identified for transfer to an organization which is exempt from paying property taxes, the Stewardship Council and PG&E will prepare an estimate of the annual taxes on lands to be donated. If assessed values on the lands recommended for donation change prior to the transfer of land, the

² *Stipulation Resolving Issues Regarding the Land Conservation Commitment*, September 25, 2003:

http://www.stewardshipcouncil.org/documents/Stipulation_Agreement.pdf

Stewardship Council will revise the payment calculation included in the proposed tax neutrality funding agreement prior to its execution by the parties.

2. The reduction in annual taxes caused by the donation of acres to organizations exempt from property tax will constitute the “Annual Base Value” for the funding calculation.
3. The County will receive a one-time lump sum payment. The Stewardship Council will provide a draft funding agreement for county review and approval using the Annual Base Value and payment option. The draft funding agreement is expected to include, among other items, the following acknowledgements by the county:
 - a. Payment by the Stewardship Council satisfies the tax neutrality requirement as specified in the Settlement and Stipulation for the subject fee-title donation.
 - b. The county has issued (or will not reasonably withhold) a Welfare Tax Exemption for the new landowner, if required.
 - c. The county will agree to distribute the lump-sum payment to the applicable special districts as dictated in the relevant Tax Rate Area at the time of payment. In consideration for the additional administrative responsibility of the county to set up the process to allocate payments to special districts, the Stewardship Council will make a \$3,000 payment to the county for county's anticipated costs to perform such activities for the first fee title donation of lands in the county. Said payment will be made at the time the Stewardship Council makes its lump-sum tax neutrality payment. For subsequent fee title donations, if a county expects to incur more than \$3,000 in costs to perform such activities, then it shall make a request to the Stewardship Council for increased funding no later than 60 days following the recording of the grant deed for each additional fee title donation or the execution of a tax neutrality funding agreement, whichever comes later. The Stewardship Council will review each funding request and provide the county with sufficient funds to cover all reasonable anticipated costs.
4. The Stewardship Council will fund the settlement amount according to the terms of the tax neutrality funding agreement as described in number 3 above no later than 60 days following the recording of the grant deed for the fee title donation or the execution of a tax neutrality funding agreement, whichever comes later.

Lump-sum payment

Lump-sum payments in satisfaction of property tax neutrality would be calculated based upon the net present value of the Annual Base Value at the time that lands are removed from the property tax rolls. The lump-sum payment will be calculated using a discounted cash flows analysis for perpetual payment streams, otherwise known as a Capitalization Rate (Cap Rate).

The Cap Rate calculation requires an assumption of a long-term rate of return on comparable investments, and a long-term inflation rate. In order to develop a Cap Rate for a lump-sum payment, the Stewardship Council considered multiple long-term inputs, including long term equity and fixed income returns (Dow Jones Industrial Average, S&P 500, U.S. Treasury,

CalPERS), weighted average borrowing costs for subject counties, and discount rate assumptions for pension and other post-employment benefits.

Based upon the analysis described above, **the Stewardship Council is offering counties a Cap Rate of 4.0%** to be used in the calculation of a lump-sum payment in satisfaction of property tax neutrality. The calculation for arriving at a lump-sum payment is as follows:

$$\text{Lump Sum Value} = \text{Annual Base Value} \div 4.0\%$$

The following table provides an example of the application of the Cap Rate to various Annual Base Values:

Annual Base Value	\$500	\$1,000	\$5,000	\$10,000
Lump Sum at 4.0%	\$12,500	\$25,000	\$125,000	\$250,000

Lump-sum payments would be allocated based upon the applicable Tax Rate Area at the time of payment. The Stewardship Council envisions making these lump-sum payments as unrestricted payments in lieu of property taxes, subject to the distribution method described in section 4.c above. Counties and special districts would be free to determine the best use of the funds pursuant to the needs of the county or special district, including, if desired investment in a shared investment pool of the county's choosing.

Appendix A

Estimated acreage and property taxes associated with PG&E watershed lands which have been recommended by the Stewardship Council Board of Directors for donation.
